Thanks Jerry.

Hi David and Glenda,

We are still pulling the team together. Once we get everyone, I will follow up with the group.

I am looking forward to working with you on this.

-Maria

Maria,

Good folks from OSIM for this are:

David Updike, my deputy – very knowledgeable and expert on infrastructure issues
Glenda Noel – knowledgeable on data public access, especially the ORD process and status.

They can back each other up.

Thanks,

Jerry

Subject: strengthening transparency in science rulemaking

Hi Jerry,

As I mentioned on Friday on the call on the impacts to ORD of the science transparency rule, we are pulling together an internal team to address public comments submitted in response to the science issues raised in the proposed rule. One of the areas we need support on is the infrastructure for housing and accessing the raw data for studies considered to

be “pivotal regulatory science”. Could we get someone from OSIM to participate on this group? It would be helpful to have someone with a broad view.

This internal team will help us identify issues and draft responses to comments. This would be a collaborative effort with us in OSP and to some extent OGC. We would ask that if needed they participate in one or more Agency workgroup meetings. We are conscious of their time and would only ask them to participate in these meetings when necessary. The participation would start in mid-August and would continue for about 7 months.

Please let me know if you have any questions or need additional information.
